ABOUT

Who I Am

I'm Abhinav Jain, a freelance IT Solutionist and full-stack developer based in India.

I help businesses build, improve, and manage their complete digital presence — from websites and software to cloud infrastructure, automation, and ongoing IT support.

Whether you're a startup, a local business, an institute, or a growing brand — I understand both the technical side and the business side. I translate complex IT requirements into simple, affordable, results-driven solutions.

End-to-End IT Support

What I Do

Website Development

Web Designing

Business Software

Cloud & Hosting

SEO & Visibility

Automation

DevOps

Maintenance & Support

PROBLEM

The Reality Most Businesses Face

No Proper Website

Missing or outdated online presence hurts credibility and sales.

Slow & Outdated Systems

Old tools slow down operations and frustrate your team.

Poor Online Visibility

Customers can't find you on Google — competitors take your leads.

Too Much Manual Work

Time-consuming processes that could be automated in days.

No IT Guidance

Technology decisions made without expert advice cost more later.

Data & Process Issues

No system to manage data, track work, or scale operations.

SOLUTION

How I Can Help Better.

I turn business problems into simple digital solutions that save time, reduce cost, and help you grow.

HOW IT WORKS

1

Business Problem

You share what's not working in your business.

2

IT Solution Design

I design the right technology fit for your need.

3

Build & Deliver

I build, test, and deploy your solution.

4

Business Growth

You save time, win more clients, and scale.

Everything Your Business Needs

01

Website Development

Modern websites that represent your brand.

02

Web Designing

Clean, user-friendly, and professional designs.

03

Cloud Solutions

Secure hosting and scalable infrastructure.

04

SEO Solutions

Help customers find you on Google.

05

Software Development

Custom tools built for your business workflow.

06

Automation

Reduce manual work and save valuable time.

07

DevOps

Smooth deployment, monitoring, and management.

08

Maintenance & Support

Regular updates, fixes, and long-term care.

This section is tailored for each client. Fill in the details before presenting.

Current Issue

[Describe the specific problem the client is facing]

Suggested Fix

[Describe the IT solution or service you recommend]

Expected Benefit

[Explain the business outcome: save time, increase leads, etc.]

Timeline & Budget

[Estimated delivery: X weeks | Budget range: ₹X – ₹Y]

Why Work With Me

Technical + Business Understanding

I understand both sides — technology and business goals.

End-to-End IT Support

From planning to delivery to ongoing maintenance.

Clean & Scalable Solutions

Built to grow with your business, not just for today.

Budget-Friendly Approach

High-quality output designed for realistic budgets.

Long-Term Maintenance

I stay with you — regular updates, fixes, and support.

Clear Communication

Simple language, regular updates, no confusing jargon.

Simple 4-Step Process

01

Understand

We talk about your business, goals, and current pain points.

02

Plan

I map out the right solution with timeline and cost estimate.

03

Build

I develop and deliver the solution with regular updates.

04

Support

Ongoing maintenance, improvements, and technical support.
